1990'dan günümüze fark yaratan ürünler, yenilikçi tasarımlar...

Products that make difference since 1990, innovative designs ...

NKP olarak, kuruluşumuzdan itibaren çalışanlarımızla, tedarikçilerimizle ve müşterilerimizle; faaliyet gösterdiğimiz her alanda kaliteli, istikrarlı ve sürdürülebilir iş ilişkileri kurmayı prensip edindik.

Gelecek nesillere olan sorumluluklarımızı gözeterek, çevreyle uyumlu, fark yaratan ve yenilikçi ürünlerimizi müşterilerimize sunmak öncelikli hedefimizdir. Amacımız, firmamızı ve üretim biçimimizi sektörün talepleri doğrultusunda sürekli olarak geliştirmektir.

Her şeyin güven ve sorumluluk ile çalışarak gerçekleştirilebileceğinin farkındayız. Hedeflerimize ulaşmak için bir yandan sektörümüzdeki teknolojik gelişmeleri takip ederken, bir yandan da ilk günkü heyecan ve azimle çalışmaya devam edeceğiz...

NKP is committed to establish qualified, stable and sustainable business relationships for our country, our employees, our suppliers and our customers in every field that we work.

Our primary goal with awareness of responsibilities towards the next generations is to deliver to the all customers by our innovative products that make difference and compatible with environment. Our aim is to develop continuously our company and business style in line with the demands of the sector.

We are aware that everything can be accomplished by working with confidence and responsibility. We follow technological developments to reach our targets in the sector as well as we continue to work with excitement of the first day and determination...

GÖMME REZERVUARLAR CONCEALED CISTERNs

Gömme rezervuarlar, su haznesi duvarın içine gizlendiği için banyonuzu daha estetik gösterir. Mekanın tasarım bütünlüğünü bozmamasının yanısıra su tasarrufu da sağlayan bir sistemdir. Montajı kolaydır, alçıpan ve tuğla duvarlara uygulanabilir.

Concealed cisterns show your bathroom more esthetic by hiding the water tank inside of the wall. In addition to not disrupting the design integrity of the space, it is a system that also saves water. It is easy to install and applicable to drywall as well as brick walls.

REZERVUAR İÇ TAKIMLARI INTERNAL MECHANISM

Kullanışlı, sorunsuz ve sessiz çalışan ürünler geliştirme yönündeki çabalarımıza bağlı olarak, müşterilerinize sunduğumuz iç mekanizmalarımız tek kademeli ve çift kademeli olmak üzere ikiye ayrılıyor. Çift kademeli takımlarda biriken su, ihtiyaca göre biri daha az olmak üzere iki farklı miktarda boşaltım yapabilir. Çift kademeli iç mekanizma sayesinde, ihtiyacınız kadar su kullanarak, gerekli olan su tasarrufuna katkıda bulunulur.

Resulting of our efforts to develop useful, smooth and quiet products, our internal mechanisms that we present to our customers are divided into two levels as single stage and double stages. The water accumulated in double stages internal mechanism can be discharged in two different ways as 3 and 6 liters. Thanks to double stages, it contributes to the required water saving by using as much as you need.
